

COOPERATIVE ECONOMIC INSECT SURVEY REPORT
Glenn A. Salsbury, Survey Entomologist

Report 7, Volume 57
June 2, 2009

CAROLINA SAWYER: Adults began emerging on 21 May at an abandoned Christmas tree farm near Rossville in Shawnee Co.

EASTERN PINE WEEVIL: Adults began emerging on 21 May at the above site. This is the first confirmed establishment of this insect in Kansas. Since the first emergence hundreds of beetles have been collected.

MIMOSA WEBWORM: Moths are now flying in Southeast Kansas.
